Akeel Mohammad

ID: 200312510879 | **Date of birth:** 04/05/2003 | **Nationality:** Sri Lankan | **Gender:** Male | **Phone number:** (+94) 761104270 (Mobile) | **Email address:** a.h.akeelmohammad@gmail.com | **LinkedIn:** https://www.linkedin.com/in/akeel-mohammad-li | **Address:** No 663/20, Kanulwela, 91500, Bibile, Sri Lanka (Home)

ABOUT ME

I am a motivated BICT (Hons) undergraduate at the University of Sri Jayewardenepura, specializing in Software Engineering, with a strong interest in software development, cloud computing, DevOps, UI/UX design, and graphic design. I enjoy developing innovative solutions, exploring emerging technologies, and transforming ideas into practical digital experiences. Through academic projects, personal learning, and university extracurricular activities, I have developed skills in Linux, Docker, web development, IoT, and digital design. I am also passionate about creating digital artwork and visual content using tools such as Adobe Photoshop and Figma. I am a creative, adaptable, and collaborative individual who continuously seeks opportunities to learn, improve my technical abilities, and contribute to meaningful projects. My goal is to grow as a software engineer while combining technical knowledge, creativity, and problem-solving skills to develop impactful digital solutions.

EDUCATION AND TRAINING

02/05/2024 – CURRENT Homagama, Sri Lanka

BACHELOR OF INFORMATION AND COMMUNICATION TECHNOLOGY (HONOURS) University of Sri Jayewardenepura

Address Faculty of Technology University of Sri Jayewardenepura, Dampe – Pitipana Rd, Homagama, Sri Lanka |

Website https://tech.sjp.ac.lk/ | **Field of study** Software Technology

21/07/2025 – 19/09/2026 Colombo 03, Sri Lanka

DIPLOMA IN HUMAN RESOURCE MANAGEMENT University of Colombo

Address Department of Human Resources Management, Faculty of Management and Finance , University of Colombo , Colombo 03, Sri Lanka

Website https://mgmt.cmb.ac.lk/dhrm

WORK EXPERIENCE

TRAINEE – BANK OF CEYLON – 19/02/2024 – 16/08/2024 – BIBILE, SRI LANKA

INTERNSHIP – AXPERIA INFORMATION SYSTEMS – 01/01/2026 – 29/10/2026

SKILLS

Sensor integration | Data mining fundamentals

Programming & Software Development

Programming fundamentals | Object-oriented programming (OOP) | Python fundamentals | Java | Bash scripting | Data structures and algorithms | Software engineering fundamentals | C | C#

Web & Application Development

HTML, CSS, and JavaScript | Next.js | Database systems and SQL fundamentals | API and web services fundamentals | Object-oriented analysis and design | Web application development | React

Infrastructure, Systems & DevOps

Linux system administration | Docker and containerization | Git and version control | GitOps | Software deployment and evolution | System monitoring | Networking fundamentals | Cloud computing fundamentals

Software Engineering

Software quality assurance fundamentals | Database management | Operating systems fundamentals | Computer security fundamentals | Microservices architecture fundamentals | Project management fundamentals | Human-computer interaction (HCI)

UI/UX & Creative Design

UI/UX design | Figma | Adobe Photoshop | Graphic design and digital artwork | Visual communication | Interface prototyping and design

Emerging Technologies

Artificial intelligence (AI) integration concepts | Machine learning fundamentals | Internet of Things (IoT)

VOLUNTEERING

PR & Editorial Team Head – Mind Maze ’25

Rotaract Club of University of Sri Jayewardenepura

Design Team Member – BioByte

IEEE Student Branch – University of Sri Jayewardenepura

Media & Marketing Team Member – IEEE Reboot 1.0 Phase 2

IEEE Student Branch – University of Sri Jayewardenepura

Programming Team Member – Heenayata Saviyak 2.0

IEEE Student Branch – University of Sri Jayewardenepura

Media & IT Team Member – Donate Happiness

Career Skills Development Society – University of Sri Jayewardenepura

PR Team Member – Touch the Peak 2026, FMSC Episode

Career Skills Development Society – University of Sri Jayewardenepura

Organizing Committee Member – Media Team, CRYPTX 2.0

ICTS – University of Sri Jayewardenepura

Media & Marketing Team Member - Aquatic wave 6.0

PROJECTS

Coco Care – Smart Coconut Farming Platform

Description
Developed of an AI-powered coconut farming platform designed to support early disease detection, agricultural decision-making and disease outbreak monitoring. Developed a Retrieval-Augmented Generation (RAG) pipeline for an AI chatbot that provides reliable, context-aware agricultural information grounded in Coconut Research Institute (CRI) resources. Integrated AI models and external APIs, connected backend services with frontend components, and contributed to automated testing and backend reliability. Also coordinated team collaboration and supported project development progress.

Key skills and technologies:
- Node.js
- Express.js
- TypeScript
- PostgreSQL
- pgvector
- REST API Development
- Retrieval-Augmented Generation (RAG)
- Gemini API
- Groq API
- Jest
- Supertest
- Backend Development
- AI Integration
- Team Coordination

Link https://github.com/itspsb2/Coco-care?utm_source=chatgpt.com

Keeper – Digital Warranty Vault

Description
Designed and developed a cross-platform mobile application that serves as a secure digital vault for managing product warranties and physical documents. Built using React Native, TypeScript and Expo Router, with Supabase as the backend infrastructure. Integrated Google ML Kit for on-device document scanning and the Gemini API for intelligent document data extraction. Managed the complete software development lifecycle, including UI/UX wireframing in Figma, application development, backend integration, testing and Android application deployment.

Key skills and technologies:
- React Native
- TypeScript
- Expo Router
- Supabase
- Google ML Kit
- Gemini API
- Figma
- Mobile Application Development
- API Integration

Linux Server Health Monitor

Description
Developed a lightweight Linux server monitoring utility using Bash scripting to track CPU utilisation, RAM availability and disk health. Implemented automated health classification with OK, WARNING and CRITICAL status levels using configurable thresholds. Integrated persistent logging to maintain historical system health records and support troubleshooting.

Key skills:
- Linux System Administration
- Bash Scripting
- Shell Programming
- System Monitoring
- Automation
- Log Management

Link https://github.com/akeelMohammad/linux-server-monitor

Keeper – UI/UX Case Study

Description
Designed a UI/UX concept for Keeper, a smart digital vault for managing household appliance manuals, receipts and warranties. Developed a user-centered interface focusing on simplified data entry, barcode scanning, OCR-based warranty tracking and AI-powered troubleshooting. Applied minimalist design principles to improve usability, accessibility and information organisation.

Key skills:
- UI/UX Design
- User-Centered Design
- Figma
- Information Architecture

Link https://www.behance.net/gallery/255438483/Keeper

LumoSense – Smart Study Lamp with Posture & Light Optimization

Description
Developed an IoT-based smart study lamp designed to improve study conditions through automated lighting and posture monitoring. Implemented ambient light detection for automatic brightness adjustment, distance-based posture monitoring and motion-based presence detection to control lighting. Designed the system using sensor integration and closed-loop control principles to improve energy efficiency and user comfort.

Key skills:
- Internet of Things (IoT)
- Embedded Systems
- Arduino
- Sensor Integration
- Automation
- Closed-Loop Control Systems

Heuristic Evaluation of Firefox Focus Mobile Browser (UX Case Study)

Description
Conducted a usability evaluation of the Firefox Focus mobile application using Jakob Nielsen's 10 Usability Heuristics. Identified and assessed usability issues relating to navigation, system feedback, consistency, error prevention and user control. Assigned severity ratings and developed evidence-based recommendations supported by redesigned interface mockups.

Key skills:
- Human-Computer Interaction (HCI)
- Usability Testing
- Heuristic Evaluation

- UX Research
- Figma
- Interface Redesign

BOC Smart Online Banking Redesign

Description
Designed a conceptual UI/UX redesign of the Bank of Ceylon Smart Online Banking platform, focusing on modernising the user experience of a traditional banking interface. Developed a minimalist, card-based interface incorporating Sri Lankan cultural elements while prioritizing usability, accessibility and visual consistency. Explored multilingual support and simplified access to frequently used banking operations.

Key skills:
- UI/UX Design
- Figma
- Wireframing and Prototyping
- User-Centered Design
- Accessibility
- Design Systems
